Onlookers, some who are said to have videoed the bizarre event, were said to be mesmerised as a towering city of sky scrapers appeared from the clouds.

First thousands reportedly saw a ghostly alien city floating over Foshan in the Guangdong province of China.

A few days later people in the province of Jiangxi, China, also reported seeing a similar cloud city.

Thousands of people were said to be stunned by the apparition

Weather experts have explained the phenomenon as a natural light phenomenon called Fata Morgana.

Fata Morgana can be seen on land or sea and involves the optical distortion and inversion of distant objects such as boats, which can appear as skyscrapers because the images become stacked, when rays of light bend as they pass through air of different temperatures such as in a heat haze.

It is also possible, considering China's technological achievements that a top secret holographic technology was tested over a heavily populated area in an effort to gauge the public reaction.

Paranormal Crucible video

YouTube channel Paranormal Crucible said in a video report: "The footage captured by a local resident appears to show a huge city floating in the clouds.

"The apparition, which was witnessed by hundreds of shocked residents, only lasted a few minutes before completely disappearing."

The channel speculated it could be "the result of a project blue beam test."

Project Blue Beam is a prolific conspiracy theory which believes NASA will one day simulate an alien invasion of Earth or second coming of Christ through holograms.
