Related Tags:Russia.</p> <p>The 'alien' found in snow in Siberia (Picture: YouTube) .The movie - made by two walkers in Irkutsk in Russia's remote Siberia - shows what appears to be the badly damaged corpse of a two foot high alien half buried in the snow.</p> <p>Part of the right leg is missing and there are deep holes for eyes and a mouth in a skull-like head.</p> <p>UFO fans believe the 'dead body' could have been left behind by ET visitors after an accident, or missed by Russian military alien experts clearing up after a crash, reports local media.</p> <p>The area is a known UFO hotspot with dozens of sightings reported every year.</p> <p>Igor Molovic, one of the pair that uploaded the video, now seen by nearly 700,000 people within a few days, said: 'We couldn't believe it when we saw it. And what was spooky is that there was no sign of the spaceship.</p> <p>'Perhaps that was taken away and the body overlooked.'</p> <p>Skeptics suggest the video is a fake using a staged model for the ET's body.</p> <p>Clicky Me</p>
